**The student and the student’s advisory committee must affirm compliance with each of the following requirements.**

- The program includes:
    1. An area of concentration (major) that includes at least 36 graduate credit hours taken at the University of Kansas, exclusive of dissertation credits and research skills requirement, and
    2. 50% of the coursework in the major is 800-level or above, and
    3. at least six credits outside of the student’s home department have been taken — not including courses required to fulfill the student’s research skills component or the doctoral core requirement, and
    4. research skills coursework supportive of the dissertation and totaling at least twelve credit hours, which may include up to six hours for credit for a reading knowledge in one foreign language (excluding English or one’s native language) or up to six hours of prior graduate coursework with letter grade of “B” or higher in research skills through course waiver\*, and
    5. verified approved coverage of “Responsible Conduct of Research.”
- Waiver\*: *All waived courses (W) listed on the previous page meets one of the following definitions:*
- a. Graduate courses taken at KU while the student was a special, non-degree student, or
  - b. Graduate courses taken at KU while the student was a post-baccalaureate student, or
  - c. Graduate courses taken at KU and reserved for graduate credit while the student was an undergraduate student, or
  - d. Graduate courses taken at the University of Kansas and reserved for graduate credit while the student was a post-baccalaureate student, or
  - e. Graduate courses taken at other accredited universities after the student had received a baccalaureate degree, or
  - f. Graduate courses used for the waiver of required program or degree course requirements must have been verified via certified transcript and syllabus review, and all such courses meet a currency standard of having been completed no more than seven years prior to matriculation in the doctoral program (or ten years prior to the dissertation defense), or
  - g. Except in the case of waivers of graduate research skills, courses that have been applied toward a previous graduate degree (at KU or elsewhere) may not be applied toward the student’s doctoral program.
- This program satisfies all departmental program requirements.
  - All courses listed used to waive program courses were earned with grades of “B” or higher. Courses that are graded on a nonstandard basis, such as pass/no pass (P/N), credit/not credit, and satisfactory/unsatisfactory (S/U), cannot be used to waive program requirements.
  - The plan of study satisfies the residence requirement of two semesters (which may include one summer session), usually consecutive, at any time beginning with the first semester of doctoral study must be spent in resident study at the University of Kansas. During this period the student will be involved full time in academic pursuits, which may include up to half-time on-campus teaching or research, or under certain circumstances, a greater percentage of research if it is directed specifically toward the student’s degree objectives. Such activities permit commensurate decreases in the hourly enrollment minima. The student must continue to be enrolled in at least six hours under any special conditions. The student understands that s/he must file in the Graduate Division office a Residency Agreement form congruent with School of Education requirements before the beginning of the formal residence period.
  - None of the courses listed on this plan will be completed with grades of unsatisfactory (U) nor with letter grades below “C” because they do not count toward fulfilling degree requirements. Students may not graduate with an “I” grade on their academic record.
